

BEVOCOVER

Vehicles, approved after 2007, September 11th, and registered after 2010, March 11th, have to comply with the Councils directive 70/221/EØF which was changed to directive 2006/20/EF.

The change encompass, that bumper and underrun must comply with the double load, compared with the previous directive.

Request the approval sheet from 1302213-258217-C for the steel bumper and 1302213-258217-D for aluminium bumper.

BevoCover is in 2 versions, steel and aluminium.

Both versions comply with the EU's new requirements.

The aluminium version can be combined with mudguards and the steel version with lights.
