SAFER DRIVING

RVS CONFIGURATOR

 **DOMETIC** **PROFESSIONAL**

DRIVE COMFORTABLE AND SAFE

Dometic camera devices are critical for maintaining the safety of the vehicle and the driver, but they also improve the safety of the general public as well. Using a truck camera improves visibility during the night, but they are also useful in the daytime as well. They enable the driver to see a variety of angles around the rear area of the vehicle where the most dangerous obstacles might be hidden from view. This includes children and pets, but it is also helpful when avoiding stationary objects while parking.

Essentially, the camera system functions as another set of eyes in the areas that are least visible. This is useful when navigating through any tight areas including alleys, backstreets and narrow parking lots with tight areas that don't provide much room for error. The driver can now confidently maneuver around various obstacles while avoiding scraping the vehicle or brushing up against any object that might scratch the paint.

We know there are many options, with this configurator we like to make it more easy to find the best solution for your application.

RVS CONFIGURATOR

CONNECT A CAMERA TO YOUR OEM MONITOR

At the next pages you find an easy overview with the solution for every application specified for your brand and vehicle. If it is a standard truck, with a trailer or semi-trailer. Of course special configuration is always possible and we are there to find the best solution for you.

TWO CAMERAS TO GIVE YOU THE OVERVIEW YOU NEED

Dometic PerfectView CAM 80

Small color shutter camera, silver, 145° diagonal

- Supplied with an adapter for connection to multimedia systems or navigation devices
- 145° wide-angle lens with large picture angle
- Automatic motor-operated cover protects the lens from dust and stone chips
- LED support for high-contrast images at night
- Mirrored picture function can be set to give you the familiar rear-mirror view
- Scope of delivery: camera, 20 m system cable, installation material

[More info](#)

Dometic PerfectView CAM 55

Heavy-duty color camera, silver, 120° diagonal

- 10–32 V input voltage range – connects to any type of vehicle
- Robust and tight aluminum housing – protection class IP 69K
- Connects to original multimedia systems and ISO bus terminals with vehicle-specific adapter
- Separately placed LEDs for glare-free vision day and night
- Optimized mounting base for a safe seal in dusty and moist environments
- Picture angle: 120° diagonal
- Scope of delivery: camera, 20m system cable, installation material

EXPAND YOUR CAMERA SYSTEM

WITH MORE OPTIONS

TURN ASSISTANT WITH OBJECT DETECTION

Dometic PerfectView BVS 71000 is a turn assistant system far superior to conventional solutions. Its innovative CAM1000 blind spot camera reliably distinguishes moving objects like pedestrians and cyclists from standing objects like traffic light poles and lamp posts. That means the driver is warned by a visual or acoustic signal

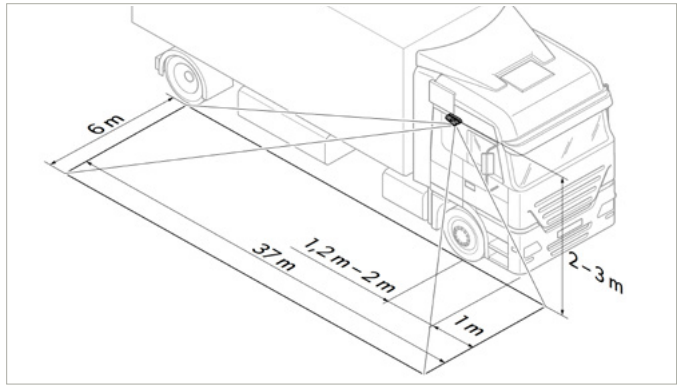

only in case of a real danger. The situation next to the vehicle is shown on the 7" LCD monitor included in the set. Very convenient: there is no need to activate the system as it will automatically switch on/off depending on the speed. Integrated infrared LEDs ensure good image quality in day and night.

Key benefits

- 3-in-1 solution: detection of moving objects, video image of the related area, active warning (visual/acoustic)
- System warns only in case of relevant dangers, i.e. pedestrians or cyclists moving in the blind spot area
- Quick and easy installation – all camera components integrated in a single housing
- Simply connects to the power supply – no extra sensors or control boxes needed
- Heavy-duty 7" LCD monitor with advanced AHD technology (Analog High Definition)
- Camera with infrared LEDs for good image quality day and night
- Compliant to Direct Vision Standard (DVS): fulfills all requirements related to a fully operational camera monitoring system fitted to the nearside of the vehicle. Eligible for funding in Germany through the "Turning Assistant" and "De-minimis" funding programmes.

COMPATIBLE WITH ADDITIONAL
DOMETIC REAR VIEW CAMERA
